

CLASSIC-CORE™

The next generation 15-in with more options.

All-in-One Capability

With the ability to run wideband, rebar, and fluid pressure all at once, Classic-Core provides unmatched versatility in the field. Multipower and Snooze™ modes let you balance depth, data range, and battery life on every shot so you can work smarter and longer.

Bluetooth® Connectivity

Bluetooth makes setup faster and more efficient. Pair while the transmitter is in your drill housing and calibrate all bands and power levels at once. Classic-Core also automatically shuts off during frequency scanning to remove potential interference.

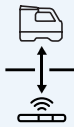

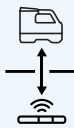

Multiple Battery Options

Classic-Core transmitters deliver the benefits of DCI's next-generation platform with the flexibility to choose the battery setup that best fits your jobsite needs. Compatible battery options include the DCI SuperCell lithium battery, LiR 21700 rechargeable lithium battery (requires DCI FTA adapter and compatible 21700 size), or two alkaline C-cell batteries. For best performance, DCI recommends the DCI SuperCell for lithium power and Energizer® for alkaline C-cells.

PERFORMANCE SPECS

Better performance with more flexibility.

	HIGH		STANDARD		LOW	
WIDEBAND * DEPTH RANGE		125 38 FEET METERS	100 30 FEET METERS	83 25 FEET METERS		
WIDEBAND ** DATA RANGE		210 64 FEET METERS	180 55 FEET METERS	160 49 FEET METERS		
RUN TIME		12 24 HOURS	20 30 80 HOURS	40 50 150 HOURS		
REBAR * DEPTH RANGE		65 20 FEET METERS	65 20 FEET METERS	45 14 FEET METERS		
REBAR ** DATA RANGE		170 52 FEET METERS	150 46 FEET METERS	120 37 FEET METERS		

*Depth accuracy within $\pm 5\%$

**Data range is based on Max Mode™

Range figures based on SAE Standard J2520. Actual ranges and battery life will vary based on environmental interference, transmitter housing, frequency, and other factors.
